New Feature

Description

The new feature us WildCats plan to implement is the ability to increase the number of followers your profile page displays without actually gaining more followers. When logged in and on your profile page, their will be a button right to the right of where the amount of followers is displayed that when pressed, your followers count will increment by one.

Scenario

Bill Nye the Science Guy only has 3 followers, and he wishes he had more to boost his ego and make him more popular. Nye goes to his profile page and clicks on the "Add 1 Follower" button and realizes his profile page now says he has 4 followers. Intrigued by the fact that he now has 4 followers, Nye clicks the "Add 1 Follower" button 697,779 more times. Satisfied with now having 697,783 followers, Nye deletes his Twitter account.
